DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of group I, claims 1-18 in the reply filed on 4/30/2010 is acknowledged. The traversal is on the ground(s) that there is no serious burden. This is not found persuasive because the search for the polymer is not required in the search of the process claims, and vice-versa, and therefor the search of both inventions would require search and review of a substantial number of additional documents beyond that required for each invention individually. Accordingly, such extensive additional search and analysis would involve serious burden.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-16 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) The claims are indefinite because in claim 1, and claims 2-16 and 18 as dependent thereon, neither the claims nor the specification define the intended scope of "significantly" in "significantly below 100°C". For the purpose of applying prior art, the

Art Unit: 1796

claims will be interpreted to be limited to the broadest temperature range for which support exists in the specification as filed, i.e., below approximately 60°C (see specification at page 11, lines 1-6; Example 1).

(b) Claim 15 is indefinite in the requirement that $R^{2'}$ of the formula (V') is H; since the formula (V') has no component $R^{2'}$, the intended meaning cannot be determined.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory

Art Unit: 1796

double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-15, 17 and 18 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-22 of copending Application No. 12/311,730. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are anticipated by the copending claims. The copending claims recite a narrower scope of substantially the same process as that of the instant claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
